Description

Costa Rican Medical Care began in spring of 2008 as a division of HSA Clearing Corp. With health care costs sharply increasing in the U.S., the principals started to investigate medical tourism as an option for Americans to save on healthcare expenses. We discovered Costa Rica as a medical tourism destination has become a very attractive option for patients seeking quality care at an affordable price closer to home than other countries offering medical services.

CRMC principals have made more than 20 trips to Costa Rica in the last two years, meeting with government officials, hospital, doctors, dental clinics, recovery centers, drivers etc. Company principals are well known in the country for promoting Costa Rica in a way to ensure quality and controlled growth. Other medical tourism providers, particularly those promoting several other countries, will not be able to provide such personalized service and experienced.

CRMC principals have worked diligently to develop relationships in Costa Rica using contacts in the government ministries and in the professional societies. Other companies can offer services in Costa Rica, but Costa Rican Medical Care is unique in its approach and relationships.
